

# P00: paired facility layouts and fixed acquisition routes

Same partitions and routes in both layouts; only the complex facility changes sides

(a) A complex / B simple

(b) A simple / B complex

- Cabinet body
- Actual external attachment
- Walls / existing backstops
- V25 r1 physical partitions
- Common paid prefix
- A supplemental route
- B supplemental route
- Return segment (arm color)

| Option | Shared prefix | Extra incl. return | Total actions | Budget |
|--------|---------------|--------------------|---------------|--------|
| A      | 234           | 120                | 354           | 400    |
| B      | 234           | 106                | 340           | 400    |

All turns and return actions are paid. Repeated positions overlap in this plan view.

Fixed GT-designed acquisition, not an autonomous policy. Active geometric probing may also reveal the extra information.
